Education

2021 - 2026 :

**B.S Digital Communication and
Multimedia Engineering**

Hanoi University of Science and Technology
(HUST)

CPA : 2.9/4.0 English levels: B2

Skills

Experienced in working with object-oriented programming languages :

- Languages: TypeScript, JavaScript, Java, C/C++.
- Frameworks: NestJS, Spring Boot.

Databases & Caching:

- MySQL (TypeORM), Redis.

Tools & Platforms:

- Tools & Platforms: Git, Docker, Postman.

Trinh Trong Tinh

Backend Developer Fresher

Summary

A motivated Backend Developer Intern with a strong foundation in web development, JavaScript/TypeScript, RESTful APIs, and database design. Experienced in building backend systems using NestJS, Java Spring Boot, MySQL, Redis, and authentication/authorization mechanisms such as JWT, OAuth, and RBAC. Eager to learn, contribute to real projects, and develop long-term as a backend or full-stack-oriented developer in a professional engineering team.

Personal Projects

Task Management Platform (Kanban)

Tech Stack: TypeScript, NestJS, MySQL, Redis, Socket.IO, Stripe

- Built a full-stack Kanban-based task management platform for team collaboration.
- Implemented authentication (JWT, OAuth) and role-based access control.
- Developed real-time features using WebSocket (Socket.IO).
- Integrated Stripe for subscription and payment workflows.

SkyJet (Advanced Programming Course)

Tech Stack: Java, Spring Boot, MySQL

- Developed a RESTful API backend for flight booking and user management.
- Implemented authentication and authorization using Spring Security (JWT, RBAC).
- Designed relational database schema and handled core booking logic.

Flood Fill (Data Structure & Algorithms Course)

Tech Stack: C++, OpenGL

- Built a desktop application to visualize the Flood Fill algorithm.
- Implemented 2D rendering and basic graphics pipeline concepts.
